You will assume the following responsibilities:

- work closely with everyone of the team to assess product requirements
- translate abstract requirements into convincing concepts and elegant UI designs, interaction models, user flows, screen designs and UI details that promote ease of use and optimize the user experience
- translate interactions into a complete UX design specification or annotated prototype as a blueprint for development
- invent and adapt gameplay concepts for various genres
- test implementations and verify that they correspond to the specification

You:

- are an expert in your area with a university degree in Media Design, Game Design, Human Computer Interaction, Information Architecture, Web Development or a similar qualification
- have very high quality demands towards your own work
- bring at least 2 years of industry experience designing interactions and interfaces for websites and applications (mobile, game and responsive design experience is an advantage)
- are used to work self organized and pixel perfect
- keep yourself abreast of state of the art design tools, techniques, accessibility standards and methodologies
- master Illustrator and Indesign, Photoshop is your native language
- have strong communication, analytical and interpersonal skills working within cross-functional teams in English (English = fluent ; German = nice to have)
- are self-motivated, able to work to tight deadlines and make logical decisions to ensure the overall success of the project by creating designs that seamlessly address customer and business concerns and objectives
- exhibit high work ethic and are a sympathetic person our team will like to work and spend time with
